DESCRIPTIVE LIST FOR 1953

FLORENCE NIGHTINGALE

30th Year of Quality Bulbs

ARTHUR A. ARENIUS

59 BLISS ROAD

• LONGMEADOW 6, SPRINGFIELD, MASS.

PLEASE READ CAREFULLY BEFORE ORDERING

TERMS FOR ORDERING — All orders cash with order or, 25% down payment, balance C.O.D. All C.O.D. orders require a down payment. All orders from the retail list will be sent postage prepaid. Orders from the wholesale list will be F.O.B., Springfield, Mass. If bulbs from both lists are ordered they will be sent F.O.B and we will include enough extra bulbs to more than offset the express charges. All orders accepted subject to prior sale .

Orders for bulblets cannot be accepted after April 15th, for small bulbs (sizes 4, 5, & 6) after May 1st, and for large bulbs after June 15th. Orders for assortments can be accepted until July 1st.

DISCOUNTS — On all cash orders from the retail descriptive list — \$2.50 to \$10.00 — you may select 10% discount in bulbs of your own choice. \$10.00 to \$20.00 — you may select 15% discount in bulbs of your own choice. Over \$20.00 — you may select 20% discount in bulbs of your own choice.

Discounts do not apply to new introductions, collections, or wholesale prices.

On cash orders from the wholesale list — 5% discount on orders from \$25 to \$100. 10% discount on orders over \$100.00.

EXTRAS AND OVERCOUNT — We give extras with all orders varying with the size of the order. Just mention some of the varieties you would like to buy and we will do our best to please you. We are noted for our generous overcount of number, quality, and size.

GUARANTEE — We guarantee satisfaction in every way possible. We attempt to send out only clean, healthy, true to name stock, and if in any way you are not satisfied let us know immediately and we will do our utmost to please you. Also if you are pleased we are always glad to hear from you.

SHIPPING DATES — Unless otherwise requested retail orders will be sent out between March 15 and April 15 in the order received. Wholesale orders will be shipped as soon as possible after receiving them. *Order early so as to be sure we are not sold out of the varieties you want.* This also gives us more time to fill your order with less chance of error and less overtime.

BULB SIZES — The retail list contains three sizes —

Large 1 1/4" up

Medium, 3/4" - 1 1/4"

Small, 3/8" - 3/4"

Large size bulbs give the largest bloom. However, medium sized bulbs will give excellent spikes about 75% as large. Most small bulbs will bloom and at the same time grow fine bulbs for the following year.

VARIETY LISTING — In the descriptive list the variety name is given first, followed by the originator's name, its show classification and the approximate number of days needed for it to bloom. We have attempted to give a description of the varieties as we see them, listing important faults as well as good points.

Due to the continued rise of costs in general, we will be unable to accept orders for less than \$2.50. Smaller orders can only be filled at a loss to us.

FAVORITES OF 1952

Here are the eight lists of varieties representing each person's favorites as they saw them last year. The first lists are the favorites among the recent introductions while the second lists are the favorites among the standard low priced varieties. Mrs. Arenius and Helen (Mrs. Art Jr.) both have seen all the varieties in our field as well as at the many shows so are well qualified to comment. They have the added advantage of liking a glad only because to them it is the most beautiful without the influence of statistics such as size, number open, number of buds, heights, etc.

APPRAISING THE NEW ONES

I shall confine my remarks mostly to the newer varieties, believing that the older varieties are too well known to need comment. However, let me say, that in many instances the new varieties are no better, and perhaps not as good as many of the old standbys.

Among the white varieties that caught our eye this summer were *Mother Fischer*, a tall stately grower that made spike after spike, with 7-8 beautifully ruffled blooms open at once, *Karen Marie* with its clean chaste plain petaled blooms, and *Maria Goretti*, the new pure white from Holland that we only bloomed from two bulbs but are now anxious to see from a larger planting. *White Symphony* can make a huge spike of bloom for the show bench but with us seems to lack a strong enough stem for commercial use. *White Goddess* continues to make those fine show spikes for which it is famous while *Florence Nightingale* is still the one we grow for its all round commercial and exhibition qualities. The new *Presto* with its large cherry throat is certainly attractive but lacked the height supplied by *Richard Crooks* the new blotched variety from Holland.

In our field *Columbia* and *Lief Erikson* stood out among the new cream varieties. *Columbia* has the wonderful color combination of *Corona* along with fine growing habits and health. *Lief Erikson* seemed almost fault free and should become widely grown commercially as well as pushing its competition around on the show table. *Taboe*, tho not the best for color, makes a tall stately spike and opens well from tight bud after being cut. *Connie G.* and *Leading Lady* will continue to win blue ribbons and rosettes along with the news ones. *LaValle* with its striking blotch and unusual floret shape can make huge spikes.

Two outstanding new ones among the light yellows are *Ruth Lorene* and *Howard V. Wright*. *Ruth Lorene*, the lightly ruffled sport of *Spotlight*, is an excellent commercial while *Howard V. Wright* is a fine exhibition variety with its 7-9 large round blooms open at once. *Candlelight*, tho a short grower, is the earliest variety to bloom for us and valuable in that respect. *Gene* and *Lancelot* are good cut flower varieties and *Lodestar* has great beauty of the individual florets.

Gold we think is the most beautiful of the deep yellow varieties. A short flowerhead doesn't seem to stop its blue ribbon winnings and just on color and ruffling alone it will go a long way as a commercial. About the tallest yellow we have grown is *Gelber Hercules* which easily grew 5½' tall for us tho it did seem to space its 8-9 open florets a little too far apart under extreme culture. *Robert Alan* has proved itself a fine cut flower and blue ribbon winner while *Sundance* would be the best of them all if it's bulblets grew better and it didn't misplace. *Hans Van Meegren* has a beautiful clean color and was well received by the florists as a cut flower.

The buff varieties are still dominated by *Patrol* and *Quiberon* on the show table although *Wilma Dittman* and *Sheberazade* can make fine spikes and are excellent growers. *Marathon* is certainly a huge variety but the color was disappointing.

Daisy Mae goes on winning in the light orange class just about as surely as Little Abner seems to get out of his many scrapes. *Orangetown* is the leader in the 300 class.

The addition of *Gatineau* to the deep orange varieties gives us a fine early one to go with the later blooming *Orange Gold* and *Betty Duncan*, both fine cut flowers. *Boccherini* another new one is also of a fine commercial while *Circe* and *Chief Pontiac* seem to be the ones to take the blue ribbons in this group.

Among the light salmon varieties late blooming *Gorgeous Deb* is well worth waiting for as we think its heavily ruffled florets are just about tops for beauty. The new *King Size* is just that, truly huge, and still possessing sufficient beauty of color and form to become widely grown. *Pink Pride*, almost as large as *King Size*, has the ability to open large spikes when cut in tight bud although it did show some flecking for us this summer. Both *Luxury* and *Polynesie* make perfect formal show spikes with the latter being a fine commercial as well. Of course *Picardy*, the perennial contender of this class, can still produce those outstanding spikes which made it famous.

The deep salmon group includes *Boise Belle* with its beautiful edging making it a most distinctive variety, the blotched *Bold Face*, a reliable blue ribbon winner, and *Dolly Vardon*, the huge salmon with a cream throat. *Glorious*, the leader in the 300's, will now receive competition from *Boise Belle*, a tough customer to beat. *Majestic* can easily make 7" blooms and *Cordova* is one of the most reliable spikemakers we have grown.

The scarlet class still finds *Red Wing* at the top for exhibition purposes although the new *Sans Souci*, from Holland, should give it a close run as more stock gets around. We like

Sans Souci for its grand color and tall reliable growth. Both *Dancing Flame* and *Flame Girl* can make outstanding spikes of rich scarlet while a well grown *Harold K.* is truly immense in a deep scarlet shade. *Carnival* and *Scarlet Glory* are eye catchers with their contrasting throats of white and cream. We also like *Atom*, the most popular miniature, and *Red Cherry*, a fine early cutter.

The light pink glads are always well represented and this year is no exception. *Clarence D. Fortnam* has proven to be a fine commercial as well as being one of the most beautiful. *Miss Holland*, much like the old *Coryphee* in color, is a straight strong grower and should become widely grown. *Sweet 16* we look to go all the way as a commercial — its beautiful color and near perfect growing habits make it a must have. *Skyway* and *Friendship* are two valuable early ones while *Evangeline* can certainly make tall impressive spikes from all size bulbs and in spite of misplacing is a grand commercial and show variety. The cherry throated *Conn- Yankee* ranks with *Spic & Span* as the leading winner of grand championships.

Two 1952 introductions stood out in the deep pink class — *Painted Lady*, to us similar to, but even more striking than *Boise Belle*, and *Jessie Mae* a highly ruffled cut flower type variety. *Kokomo Giant* made huge spikes with up to 9 formally placed blooms open at once while *Citation* grew the tallest of anything in our fields — some spikes reaching 6½'-7' in height. Of course *Spic & Span* goes on its merry way winning Grand Championships left and right.

Among the light red varieties *Poinsettia* lived up to our expectations with its fine spikes and good healthy growth. It should make a topnotch cut flower. *Mid America* and *Leah Gorham* we expect to continue as the leading exhibition varieties.

Our favorite of the deep reds is *Dee Twelve* which we think has the finest color of the red varieties as well as being a tall reliable grower. Also catching our eye this year were *Capt. Kidd* and *Deep Velvet* with their smooth velvety color. *Big Joe* certainly lives up to its name with huge spikes but *Jo Wagenaar* runs it a close second for size and has better placement.

The "big noise" of the black reds is *Dark David* with its huge florets and good healthy growth tho we wish the color was a bit clearer. *Black Cherry* still leads for blue ribbons but is getting more competition from *Mrs. R. G. Errey*, *Hamlet*, and *Black Knight* as well as *Dark David*. We especially like *Ruffled Night* for its clear glistening color, excellent ruffling, and neat precise spikes. The two darkest ones for us are *Abesinnie* and *Negus*, two new ones from Holland.

The light rose class we think has some of the most outstanding of the newer glads. *Francesca*, on sheer beauty alone, would be a topnotcher but combined with good growth and health is truly outstanding. *Pennant* gave us wonderfully consistent growth, every spike like the one before with 8-10 formally placed blooms open on a 4½' spike. *Glad Tidings* is a deeper shade — just the color the florists are looking for — and gave us many fine spikes. We feel *Andrena* is a much overlooked glad because with us it has everything — beautiful color, a 100% cutter, good propagation, and health. It is one of our favorites. We also prefer *Elmer Rose* to *Noweta Rose*, even tho it doesn't open as many, because of its clearer color and more consistent growth. *Rosy Future* has proved itself a fine commercial because of its fine habits and clear color.

Karen is attracting much attention among the deep rose glads due to its distinctive color combination. *Noweta Rose* still leads the exhibition varieties although *New York*, a new one from Holland, should provide stiff competition. *Madeline Hefty* is a fine cutter and a most reliable grower and appeals to us as a commercial. *Lila Wallace*, with its slender graceful spike is a topnotch arrangement variety and *Mallow* is about the tallest in this color.

Grown only from small bulbs by us, *Heirloom* showed much promise. We thought the color and spike formation to be tops, the only question remaining is how tall it will be from large bulbs. This year's introduction, *Princess*, should go far on the show table and we are quite enthusiastic about its commercial qualities. *Tyrone* has that true lavender color we like but only would open six blooms for us this year. *Sublime* is a much earlier variety than *Tyrone* in a similar color. *Bridal Orchid* can be breathtaking when the color is clear while *Sunday Best* and *W. H. Hosmer* have proven to be fine commercials. *Orchid Fantasy* should win easily in the 366 class and *Wedgwood* is, of course, one of the most beautiful and a must have for arrangements.

King David and *The Rajah* seem to have jumped to the head of the purple class. Both are reliable growers *The Rajah* the tallest and *King David* able to open the most. We like both for any use. Last year's introduction, *Royal Scot*, gave us topnotch spikes of rich royal

purple. *Kashmir* we think has the richest color of all the purple glads as well as the heaviest ruffling. *Parade* is the earliest in the class and a fine spikemaker.

The highly touted *Gustav Mahler* proved to be a fine healthy grower and a large one too but the color doesn't come up to that of *Abu Hassen*. *Blue Devil* has about the most striking color combination of any glad and is rapidly gaining prominence as an exhibition variety. *Blue Bonnett* and *Libretto* are two fine varieties among the lighter blues. *Ravel*, we have stopped growing because of its poor health; a prime factor among the "blue" glads.

Among the smoky and any other color varieties, we list a great many of either because we like them or else they have proven to have widespread popularity. Opinions vary so greatly that we will just say that we include the following new ones among our personal favorites; *Persian Rug*, *Storm Terror*, *Stormy Weather*, *Wahoo*, *Alzada*, and *Salamanca*. The top rated exhibition varieties in this class include *Stormy Weather*, *Dusty Miller*, *Persian Rug*, *Gray Summitt*, *Buckeye Bronze*, and *Vagabond Prince*.

FOR THE COMMERCIAL GROWER

We are frequently asked what we consider the best varieties to grow for commercial cut flower uses. This list contains the leading varieties among the low priced group as well as many of the newer ones that we believe will soon supplement them. All in this list can be grown with confidence and the knowledge that your blooms will be of the finest available. Varieties marked * we consider the best for shipping purposes.

1953 INTRODUCTIONS

PRINCESS

From J. R. & C. T. Larus

PRINCESS

PRINCESS opens 8 to 11 perfectly placed, 5" to 5 $\frac{1}{4}$ " rose lavender florets that have a cream throat and a deep rose spear. The ruffled florets are similar to Eliz. the Queen, but considerably deeper and more rose. The spikes are 50" to 60" tall with a 23" flowerhead carrying 19 to 24 buds. The foliage is vigorous and husky.

This past summer Princess was grown and tested by 7 of the most prominent and reliable growers in this country and Canada. Every one of them recommended its introduction and rated it highly. In no case (including our garden) has any misplacement, crooking, flecking, or poor health been noted. Five of these men reported actual measurements under field conditions. The average of these measurements was 50" tall, 23 $\frac{1}{2}$ " head, 19 buds, 5" floret, and 8 to 9 open. These results under average culture indicate that Princess is a fine commercial prospect and does not require special care to produce large spikes.

Its growth habit are among its strongest features. Bulblet production, germination and health are excellent. The ability to open up to 11 in precise placement has been one of the factors that has made Princess the best show variety in our garden. No other variety with the possible exception of Leah Gorham has been so reliable in consistently producing top grade spikes.

As seedling 46-39-3 this lovely lavender has compiled a remarkable show record. Prizes include:

KING SIZE

KING SIZE

From Champlain View Gardens

Here is a variety that has really gone to town the past two years. It has won 4 Grand Champs, 8 Seedling Champs, plus numerous other special awards such as longest flower head, most open, largest floret, etc. In the 1951 test gardens it was the highest rated variety. In 1952 it would have won the American Home Achievement Award except that one of the judges said it was not a commercial. However on the seedling table it scored a full point higher than the A H A winner. Afterward a New York wholesaler visiting our gardens said it was just what they were looking for in New York. However I admit that from large and jumbo bulbs it may get too large for general commercial use. But where they want the extra large ones this is it. From medium and small bulbs it will make a nice commercial grade.

This giant of giants is a clear light salmon with a few carmine lines on a rich cream throat. Opens up to 10 or more 6½-8" well placed blooms on a long head of 36-40". The plants from large bulbs consistently run from 6-6½ feet or over tall with up to 26 buds. It has good substance and opens well when cut.

The KING SIZE will have a certain limited use. Its main use will be for exhibition and for the home garden. Everyone will want to see how big he can grow this variety. It certainly grows larger and taller than any variety I ever saw.

It is a good propagator and makes many average size bulblets that germinate well.

KING SIZE has been the talk at shows where it has been exhibited and I am sure it will have tremendous popularity.

L 1/5.00, 3/14.00, 10/40.00

S 1/3.00, 3/8.50, 10/25.00

M 1/4.00, 3/11.00, 10/30.00

Bulblets \$1.00 each but sold only with bulbs. With each dollar's worth of bulbs bought \$5.00 worth of bulblets may be bought at \$1.00 each.

PEACE LIGHT

From E. A. & E. F. QUACKENBUSH

PEACE LIGHT (Kadel) (410) Gardenia x [Myrna x (Mamie x New Era)] Peace Light is a clear, medium, yellow with a soft greenish glow. Its large, wide-open florets with recurved petals are borne on a tall, strong stem. It opens 7 florets with 5 more showing color on an 18 bud spike.

While Peace Light will doubtlessly hold its own on the show table, we feel that its greatest success will be as a cut flower. This opinion is based on its color value, its excellent substance, the fact that it is a tall, vigorous grower and that it propagates readily, making strong growth from bulblets. It grows 56 inches tall and blooms in 82 days.

Its unusual phosphorescent glow attracted much attention from the hobbyists and commercial growers who saw it exhibited at the Union, Havre de Grace, and Binghamton shows last summer.

Price—\$3.00 each any size bulb. 1 bulb and 10 bulblets, \$5.00.

10 bulbs, \$24.00. 10 bulbs and 100 bulblets, \$40.00.

Bulblets sold only with bulbs. (No discount.)
